Customer Problem Statement Template

The **Employee ID Card Request** project focuses on simplifying and accelerating the handling of employee ID card requests. By leveraging ServiceNow's Service Catalog, workflows, and automation capabilities, the solution eliminates manual bottlenecks and ensures requests are processed efficiently. Employees can easily submit ID card requests through a self-service portal, while automated routing, approvals, and task assignments streamline fulfillment. Where applicable, integration with HR systems enables automatic verification of employee details and request processing. This results in faster turnaround, improved SLA compliance, reduced administrative effort, and enhanced transparency for both employees and HR teams.

Aspect	Description in context of our project	
 I am		We are ServiceNow developers and IT automation enthusiasts working on building an employee ID card request management solution.
 I'm trying to		Build a streamlined way for users to submit employee ID card requests and automate the entire approval, fulfillment and notification process.
 But		Currently, the process is manual and time-consuming, leading to delays, errors, and limited visibility.
 because		Requests are routed through emails and spreadsheets with no automation, proper tracking or SLA compliance.
 which makes		The solution valuable by providing faster request handling, improved accuracy, better transparency, and higher user satisfaction.
